

Description

UML class diagrams map out the structure of a particular system by modeling its classes, attributes, operations, and relationships between objects.

- To customize this template:
- Click on any shape and type the information you would like to include.
 - Add and arrange class shapes as needed.
 - Update cardinality.
 - Click on a line and navigate to the properties bar to adjust the endpoints.
 - Click on a line and hover over the gear icon to add multiplicities.
 - Add additional lines by hovering over a shape and clicking the red dot.
 - Alternatively, you can automatically generate class diagrams from your Bitbucket repository.
